- Mar 2022 - Aug 2024** ■ **B.D.S**
Baba jaswant singh dental college Ludhiana, Ludhiana
BDS, or Bachelor of Dental Surgery, is an undergraduate program that prepares students for a career in dentistry. The curriculum typically covers various subjects such as anatomy, physiology, biochemistry, dental materials, oral pathology, and clinical dentistry. Students gain hands-on experience through clinical practice, learning to diagnose and treat dental conditions.
The program usually lasts five years and includes both theoretical and practical components. Graduates are equipped to work in private practice, hospitals, or research, and they may also pursue further specialization in various fields of dentistry. BDS is recognized globally, and in many countries, graduates must pass a licensing exam to practice.

The National Eligibility cum Entrance Test (NEET) is a standardized exam in India for students aspiring to pursue undergraduate courses in medicine and dentistry, such as MBBS and BDS. Conducted by the National Testing Agency (NTA), NEET assesses candidates' knowledge in

I consent to the processing of my personal data for the purpose of recruitment for the position to which I am applying.

- subjects like Physics, Chemistry, and Biology. Typically held once a year, NEET is crucial for admission to medical and dental colleges across India. The exam consists of multiple-choice questions and is designed to evaluate a student's understanding of fundamental concepts, critical thinking, and problem-solving abilities. NEET has a significant impact on students' careers, making it essential for aspiring doctors and dentists to prepare thoroughly. Success in this exam opens doors to prestigious medical institutions and paves the way for a fulfilling career in healthcare.
