

To Whomsoever It May Concern

I am pleased to recommend Manoj SP for the Masters In Science Program in your prestigious college/university. I have known him for the past three years teaching him courses like Materials Science (Semester 3), Manufacturing Processes (Semester 4) and Foundry and Forging Laboratory (Semester 4). During his stay, I have had interactions with academic and personal level, his commitment to the work and desire to achieve it is excellent.

Throughout his course of study, Manoj SP has shown great interest in practical aided learning techniques. We have engaged in several courses and other discussions in which, he confidently talked about his aspirations towards higher education. He has always submitted his assignments and project reports well before deadlines and he is well focused with a keen interest in the practical application of the subject. His habit of relating everything taught in class with the everyday applications has strengthened his base. The project topics which he had chosen on his 3rd and 4th year of study were very unique: **'Design and Development of Suspension Mechanism for Rough Terrain Surface' & 'Design and Development of Compression Molding Machine'**.

Manoj SP's academic accomplishments are rivaled only by his personal strengths. His honesty and competence are good and he is well-loved by his peers, as well as all those who have the pleasure of teaching him. Whenever a difficult situation arises, he is always ready to tackle and conquer it head on and will blend well into the new environment.

I sincerely believe Manoj SP will bring unique optimism, passion, and tireless creativity to your university as a whole. Thus, he has my highest endorsement for admission into his desired course at your university. I am confident he will make an excellent addition to your university's community. If you have any questions about this recommendation please do not hesitate to contact me for I will gladly try to help.

Yours sincerely,

Dr. M.C. Murugesh

Designation: Associate Professor

Department of Mechanical and Manufacturing Engineering
