

TO WHOM IT MAY CONCERN

I am pleased to recommend Mr. Nabanil Das (Reg. No. 20140312), for Post Graduate Program at your university. Mr. Nabanil Das completed his B. Tech in Mechanical Engineering from Sikkim Manipal Institute of Technology in the year 2018.

I came to know him personally in the 2nd year of his course, when I taught him courses on Material Science. He was very sincere and hardworking student of his class. Academically, I found him to be among those few students who would venture beyond coursework to understand their subjects clearly.

Each year, very few students offer a unique standpoint and really embrace their angle of learning the subject matter. It is based on various discussions, that I simply could not turn down this letter of recommendation. He truly is an intelligent student with results justifying hardworking efforts. His hunger for practical knowledge is reflected in the various counselling sessions he had with me. His views and aspirations during group and public discussions are solid of his scholarly ability and gentle principles.

Nabanil is very well adored and respected by both his classmates and professors. He amazes me with his certain determination for continued improvement in his overall stature. I am confident that his talent will reverberate your highly reputed institution. Hence, I strongly recommend him for admission into your institution.

Regards,

Dr. Ranjan Kumar Ghadai
