LETTER OF RECOMMENDATION

In the capacity of Head of Mechanical Engineering department at this college, I have come across many students asking for recommendation for their higher studies. I have always recommended only the promising students who showed determined and responsible approach towards their career. I am writing this recommendation for one such deserving student, Mr. Devesh Anant Borse for the masters program at your university. I have known Devesh for the past two year teaching her courses in Refrigeration and Air conditioning, Hydraulics and Pneumatics in 6th and 7th semesters respectively. I have also supervised her practical work for these subjects.

Devesh has a positive attitude towards life. He is a smart working student with zeal to learn. He has a good intellect which help him to lead healthy classroom discussion with others. Through his course of study, Devesh has shown great interest in practical aided techniques. Besides the academics, Devesh Coordinates MESA events held within the department and college, which displays his leadership as well as communication skills effectively.

Devesh is protective and always attempts to relate theory in real world situation and tries to modify them. An intelligent, sincere and conscientious student, Devesh has maintained a good academic record in my course. His performance can be described through him clear concepts and strong fundamentals, which have always enabled him to grasp new ideas and topics with relative ease. During his course Devesh underwent an internship in 'Tulshi Industries' where he got a chance to get acquainted with industrial work culture and boost his technical skills.

I have the deepest personal and professional respect for him, and sincerely believe Devesh will bring him unique energy, optimism, passion, and tireless creativity to your class and university as whole. So, he has my highest wishes for admission into his desired course at the university and I therefore strongly recommended him for admission with maximum possible scholarship.

Regards,

Prof. Dr. Prashant. B. Nehe.

Head of Department (Mechanical Engineering)

R.H.Sapat college of Engineering, Nashik.

M-Tech (Thermal and Fluids) IIT Bombay.
