TO WHOMSOEVER IT MAY CONCERN

I am pleased to recommend **Mr. Dhiraj Sanjay Powar**, student of Priyadarshini Institute of Engineering and Technology, Nagpur for Graduate program in Biotechnology at your Graduate School. He undertook his final year dissertation work of his B. Tech program under my supervision and know him very well for the last one year.

During my supervision as his Guide, I had opportunities to observe him from very close quarters and form a firm objective impression about him. Dhiraj has always been a very focussed, diligent & sincere student. He displays a keen sense of learning & assimilating facts. He has an extremely innovative & inquisitive mind set which I could sense during dissertation. The originality of his ideas and boundless curiosity makes him a perfect candidature for research work.

He worked on the cell culture lab and explored the Antiproliferative activity of *Listeria monocytogenes* on cancer cell line. He successfully learnt basic cell culture tools and techniques. Dhiraj, is an ardent learner with an incisively analytical mind and systematic work habits. An appealing aspect of him is to put forth his personal ideas in an obedient manner. Due to his amicable nature & good qualities, he has made his presence felt among all his colleagues.

Dhiraj Powar has the necessary aptitude, dedication, motivation and perseverance for achieving his goals. Taking all qualities into consideration and confident about his success, I strongly recommend Mr. Dhiraj Powar for graduate study program at your institution.
