LETTER OF RECOMMENDATION

It gives me immense pleasure to recommend Ms. Rupal Kotangale for master's program at your esteemed university. Rupal has been my student for three years since 2014. She secured 7.63 CGPA in Bachelor of Technology in Electrical Engineering and her performance in my subject were always good. I taught her "Control Systems" and "Power Electronics". I was her mentor for final year project based on "Touch screen and accelerometer based wireless motor speed and direction controlling system using PIC" where she acquired excellent marks. She has been a meticulous student with good potential for higher education.

Being her mentor, I have observed that she shows excellent grasp of learning new concepts and outstanding ability to apply them practically. She was committed to the course work and assumed her primary role of learner with quiet confidence. She would take every learning and practical with responsibility, was methodical in her approach to assimilation and understanding. She displayed a sincere, disciplined approach towards the curriculum and good sense of time management.

During her final year project, she was very punctual in her assignments and report submission. She meticulously planned weekly work and drove the project steadily under my guidance. Apart from programming of microcontroller circuits, she has also worked on the onscreen simulation of programs which allows the programmer to correct the faults and change the program. She has shown proficiency in using MATLAB for designing pneumatic circuits and PID control system.

I have always observed good cognitive skills and strong aptitude in problem solving in her. She actively participated in classroom discussion and portrayed her communication and cognitive skills. From my classroom interactions with her I could figure out that she has full understanding of fundamental which demonstrate her keen interest in studies. She also demonstrated good teamwork skills in group assignments.

Rupal puts in a lot of hard work in her work. She is clear about her objective and her thinking is logical. She is an amiable and well-mannered student who works harmoniously with team as well. She is very helpful and maintains good relations with her faculty and her friends. I am confident that she will continue to succeed in her further studies.

I am fully convinced that she is worthy of being an asset to your university. I, therefore, strongly recommend Rupal to pursue her masters at your prestigious university. I wish all the best in her future endeavors.

Sincere Regards,
Mrs. J.O. Chandle
Associate Professor
Veermata Jijabai Technological Institute, Mumbai
