LETTER OF RECOMMENDATION

It is a pleasure to recommend **Mr. karnatam praveenkumar reddy** to your master's program. He has been a student of our Computer Science and Engineering at Siddhartha Institute of Science and Technology which is affiliated to JNTUA. In his four years here he has shown exceptional growth, both in terms of knowledge gained and in his grades.

I have been his professor for the following courses:

1. Object-Oriented Programming using Java- Lab in the fourth semester.
2. Data warehousing and Mining in the sixth semester
3. Data Analytics in the final semester.

Over this time he impressed me with his dedication to learning and his grasping abilities. Another aspect that impresses me about Praveenkumar is his verve and ability to look beyond the curriculum and keep himself updated with the latest developments in his field. He then brings these inputs to the classroom thereby raising the overall standard of learning.

Apart from his zest for learning, he has impressed me with this ability to take up challenging assignments and do justice to them. He also did an internship at Ydi solutions Pvt Ltd in "**Applied Machine Learning using R**" to get enough industrial exposure. His style is simple and direct. He had done in-depth work on some subjects and thus could convey his depth and understanding. His interest in the field was also apparent during my lectures. His class assignments showed his meticulous way of working and his time management.

It came as no surprise when Mr. Praveenkumar mentioned his desire to pursue a master's degree. He is fully qualified for the same. I strongly recommend him at your esteemed university for master's graduation studies with full financial assistance. I would be happy to communicate with you if you would require any additional information.

Mr.M.Doorvasulu Naidu
