

STATEMENT OF PURPOSE

My name is Nancy Vishwas and I am resident of Delhi, India. I am pursuing my final year of Undergraduate in B.sc (Information Technology). As a child, I was mesmerized how we could do everything on a laptop which my parents gave me as a gift. I used to play games, watch anime and I really used to like every aspect of it and always had a desire to know more about how it worked. This intuition to know more about technology persuaded me to study about it. I had many questions in my mind I was curiously looking for the right opportunity to get the answers.

An investment in knowledge pays the best interest. My parents realized this very early in my life and provided me with the best education possible by them. I'm very indebted to them for encouragement they gave me to study and explore new things. I did my schooling from Guru Harkrishan school (CBSE) and completed my 10th grade in year 2016 and 12th grade passed out in the year 2018. I was always fascinated towards the new development in the field of computers so I choose b.sc(it) as my major in undergraduate course. My exposure to information technology began after I entered the Amity institute of information technology (AIIT), Noida. The excellent facilities, course and faculty have given me a firm background of the information architecture and fundamentals. I have found IT most intellectually satisfying and stimulating. The remarkable contribution that a small device such as a computer can make towards success and development has only been a fascination but also a motivation for me to learn and be a part of this modern era evolution driven by computer application. C++ introduced me a whole new world of next generation programming Language. I knew I wanted to spend my life researching, developing and optimizing Information Technology to diversify my knowledge base. I did well in undergraduate and have 7.75 CGPA. I am highly motivated to apply for advanced studies in computing and I consider myself the right candidate for Master in Management & Technology programme at Solbridge International School of Business.

My keen interest since my school days has been in computer and programming languages. During my first year my decent knowledge of algorithms and C programming skills have always been my strength. Subjects such as object-oriented programming, structured programming approach (C, C++), Unix operating system and shell programming, Network Basic, Cyber Security. These subjects are intuitive as well as their value and implementation could be seen everywhere around us.

During my 3-year study in the university as an under-graduate, I have built up a solid foundation of professional knowledge, as well as a rich experience of social activities. As a IT student I also acquired hands on experience in research paper and projects in order to provide a strong base for my undergraduate studies. Projects done such as research paper block chain in Iot , NTCC Iot application research paper , Major project App development(Medical store application), Human values and community outreach.

Apart from the educational pursuits, I have always been an active and fun-loving person. Active participation in sports and extra-curricular activities brought out liveliness in my life. My hobbies are painting, learning new languages and skateboarding. participation in cultural club activities help me to socializing with my classmates developed a firm network of fellow student which helped me throughout my graduation.

A master's degree in Management & Tech. from Solbridge International School of Business will pave the way for my academic and career goals. Thus, I would be happy to be a part of your prestigious university and move towards a promising future. I am hardworking and have necessary motivation and commitment to sustain work that I intend to undertake. I look forward to the programme. Which is the most important step towards the achievement of my goals. I will treasure this opportunity and make every effort to live up to my highest potential.
