LETTER OF RECOMMENDATION

Date: 15.11.2021

To whom it may concern,

I am pleased to recommend **Mr. IBRAHIM MALIK MOHAMMAD** to your esteemed institution for his graduate studies. I have known him from the capacity of being his professor for the courses on Power Plant Engineering, Applied Engineering Thermodynamics and Thermal Engineering Laboratory; though he has scored impressively in all these courses yet in the latter two he stood among the high scoring students.

An eager and enthusiastic student with a penchant for learning, Ibrahim was an interactive student in class. Possessing a sharp intellect and quick grasping power he was not only able to gain a sound fundamental understanding of the topics discussed but he was also able to understand the new and taxing concepts with absolute ease. Every single argument that Ibrahim made was well thought out and supported by logical, analytical and problem solving reasoning.

During practical classes, Ibrahim's tendency to use his academic knowledge to address real world problems came to the fore. He was able to use his conceptual knowledge to practical scenarios with great accuracy and ease, thereby allowing him to complete his work within the allotted time. Not just practical classes, assignments and examinations but even Ibrahim's presentation attested to his technical knowledge and skills. **Mr. IBRAHIM MALIK MOHAMMAD** is responsible and punctual nature made me rely on him to aid me in official tasks; these attributes were also the reason behind him being selected as the NCC cadet. His vast technical knowledge and skills that I have glimpsed throughout our association made me encourage him to work on his major project from Shardlow India Limited.

Resolute, determined and in constant pursuit of academic excellence are some words and phrases that I would use to describe Ibrahim, who will always embrace the challenges that come his way. He will rely on his skills and your expert instructions to lead him towards unprecedented success, and bearing this in mind, I recommend Ibrahim to you as an ideal candidate without reservation. Do not hesitate to contact me for further information.

Yours sincerely,

Dr. J.M. Babu

TO WHOM IT MAY CONCERN

I extend my highest recommendation to **Mr. Ibrahim Malik Mohammad** as he seeks enrollment into the Master's Program at your accredited university. As a professor we come across number of students, but there are only a few who can leave a lasting impression and **Ibrahim** was one of them. Desirous of gaining a comprehensive knowledge of the field that he had undertaken to pursue; he was a regular attendee in my classes.

His theoretical and practical proficiency was discovered during these classes, as his fast-paced mind ran through different steps to bring the results that he held his expectation for. This made him approach me with thought-provoking questions as he attempted to enrich his mind with empirical ideas and these conversations brought his dedication and hard work to the limelight. The first to complete the lab work and submit them, Ibrahim's punctual nature asserted him to do the same when it came to theoretical work as well. Quickly processing different ideas and thoughts, Ibrahim was able to bring a correlation between them; his cohesive thoughts were organized and every claim that he made was complimented by his strong reasoning skills. His thoughts loudly resonated with me whenever I evaluated his work and Ibrahim was deserving of the impressive scores that I graded him with. While I have talked about his punctuality, I must admit that his responsible nature, which made me elect him as the class monitor, was honed by his being a part of the NCC. On completing three-years with them, he received a certificate, and I really appreciate the sincerity with which he served them.

Perceiving each opportunity that comes his way as a learning curve, he will imbibe lessons from them and also from the teachings that you impart to him. An industrious student, he will persevere on the path that leads him to vast accomplishments. My confidence in Ibrahim and his potential persuades me to support him in all his endeavors.

Date: 01.10.2021

To Whom It May Concern,

I am writing this letter to happily recommend Mr. Ibrahim Malik Mohammad for graduate studies at your institution. I have known Mr. Mohammad for three years, while he was a student at Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology in the Department of Mechanical Engineering. I have taught him Tool Design Engineering, and have also guided him in a minor project, and am glad to report that he has performed admirably in all the said courses.

I think I first noticed Mr. Ibrahim in an interactive session in my classroom. He was a very energetic and enthusiastic student, and one could see in him an eagerness to learn more about the concepts discussed in class. He has shown a very inquisitive spirit during our association, as was very evident in the way he would pose thoughtful questions to me to understand the concepts better. If he had difficulty in understanding the said concept, he would always reach out and ask me questions for clarification, which showed his eagerness to learn more. I have seen him scrutinize each and every problem and approach it in a methodical manner which gives him the best results. I personally think that it is a very admirable and systematic mindset to have in a student of our field.

During working on the project, he made good use of the sessions to put into practice his strong theoretical knowledge which he acquired in the class, and truly was a joy to have in my class as his energetic personality raised the spirits of his peers greatly. This was also very apparent in the way he would take part in class discussions, collaborating with his peers on the subject while conversing in a clear and concise manner. Indeed, I was not very surprised that he performed marvellously in his academics, as it was expected that he would be one of the top scorers in this subject. The quality that I appreciated most in Mr. Ibrahim would be his discipline. He is incredibly disciplined and it reflects in the fact that he handed in all the assignments, with all precise and accurate solutions to the problems.

It is my firmest belief that a student as bright as Mr. Ibrahim will have a lot to gain from graduate studies under your supervision and guidance at your esteemed institution. I am also very sure that it will help him realize his career goal of carving a niche for himself in this field because graduate studies will definitely open new doors of opportunities for him, and provided your institution's track record in producing the finest students in this field, it will definitely bring him a step closer to fulfilling his aim. It is therefore with best wishes for all his future endeavours that I recommend him unreservedly for graduate studies at your university. Should you require any additional information, please do not hesitate to contact me.

Sincerely,

Dr. Sachin Salunkhe
