Dear Admissions Committee,

It is a great pleasure to recommend Mobashshir Kareem for admission to your engineering program. He is one of the exceptional students I have encountered in my 15 years of teaching. I taught him in 11th and 12th grade. He has a keen interest in and talent for chemistry, math, and scientific inquiry. His passion for the subject makes him an ideal fit for your rigorous engineering program.

Mobashshir is a perceptive, sharp, quick individual with a high aptitude for math and science. He's driven to understand how things work. His thirst for knowledge combined with his ability to think outside the box makes him the perfect candidate for the course he is applying for.

His personal strengths are as impressive as his intellectual accomplishments. He has an active, outgoing presence in class with a great sense of humour. He is the perfect person to get a group project rolling, but he also knows how to sit back and let others take the lead. His cheerful nature and openness to feedback mean he's always learning and growing as a learner, an impressive strength that will continue to serve him well in college and beyond. Mobashshir is just the kind of driven, engaging and curious student that helped make our classroom a lively environment and safe place to take intellectual risks.

Mobashshir is also willing to work on areas he feels he could improve upon. He was aware that his fear of public speaking was holding him back, so he worked diligently to improve his speaking abilities. He would specifically take activities that require speaking to gain confidence. When he was delivering a speech during the farewell party, we noticed that he has improved so much that we use his improvement as an example.

Mobashshir has my highest recommendation for admission to your engineering program. He has demonstrated excellence in all that he puts his mind to, whether it's conducting experiments in the lab or speaking in front of an audience. His endless curiosity, combined with his willingness to face his fears and take risks, leads me to believe there will be no limit to his growth and achievements in college and beyond.
