

Letter Of Recommendation

This is to certify that **Ms. Archana J V**, was working with RAAD Systems Pvt Ltd (Formerly RAAD SYSTEMS) since July 16, 2018. She was designated as an Embedded Software Programmer.

As a Project Manager, I have known Ms. Archana J V for around three years, where she reported directly to me. In this capacity, we have regular interactions regarding the work status. Archana has good professional skills and a very constructive outlook, and she has consistently voiced her views valiantly during our discussions and meetings. Moreover, she is a charming and caring person who never dismisses someone.

Though Archana joined as a Intern Embedded Software Programmer, she proactively stood forward in taking various responsibilities and through retrospection and constructive feedback, she performed well. She worked with various Projects. Her responsibilities include investigating the issues raised by clients and resolving the issues and on-call discussion with client. She grasps information and implement it accordingly. She has owned the entire project where she developed Desktop application for controlling motor drives, Laser integration, NFC and gave the deliverables on time with proper documentations.

Aside from her intellectual capabilities, Archana is often recognized as a pleasant and well-mannered teammate. I am so pleased to learn of her decision to seek a Master's degree. Finally, I believe Archana will be a promising student at your respected university, which will be the perfect setting for her to hone her current skills by pursuing a Master's degree. Her logical analysis and prowess would help her in achieving her objectives. Therefore, I wholeheartedly recommend her for admission to your prestigious university, and I can assure you that Archana will always make her best contribution during her program.
