

Letter of Recommendation

October 26th, 2021

To whomsoever it may concern; It is my pleasure to recommend Suresh Kumar Subramani for post-graduate studies at your esteemed university. I've had the pleasure to know Suresh Kumar and work with him over a period of 8 years from 2013 to till date, as part of the CAD DESIGN. In my capacity as the Chennai Lead, CAD ENGINEERING and Change, I was closely associated with Suresh Kumar as him CAD Engineer for 3 years and found him to be an excellent professional and a fine individual. For the 3 years that I managed Suresh Kumar, He performed outstandingly well that earned him two promotions and chairman shares for him exceptional performance in those years. Suresh Kumar most noteworthy professional strength is him ability to understand human nature. He is forthcoming in nature and has an amazing sensitivity towards the needs and the feelings of his fellow colleagues and stakeholders which makes him a valued member of any team. Another of Suresh Kumar's forte is his commitment for being aware of all the nuances of his field.

I am sure that as an optimistic and sincere individual as he is, he will prove to be a great addition to your university.
