LETTER OF RECOMMENDATION

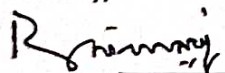

It gives me immense pleasure to recommend Mr. Shubhankar Das who is interested in pursuing his higher studies at your reputed university. I have known him from 2018 as a graduate student of the Department of Biotechnology and was very happy to guide him as his Dissertation mentor. I have also taught him the fundamentals and practical applications of Genetics which will be beneficial in his post graduate program. This has led me to keenly observe his academic and personal traits.

As his Professor, I have observed disciplined management of assignments and good time management skills. He has impressed me with his thorough knowledge and curiosity to learn more. I applaud the consistency in his performance and sheer determination to achieve greater heights. He actively participated in teaching sessions and did not hesitate to ask doubts. His presentations were good and up to the mark. I have personally observed his proficiency in applying theoretical knowledge in practical field and found it quite satisfactory.

He mingles well with his fellow batch mates and willing to help them in their bad times. This was reflected to me during the group practical sessions. He has always been open to challenges and put immense efforts to work out in dire situations. I am sure his potential amicability and generosity might prove him to be an asset for any higher education institution.

I highly recommend you to accept Shubhankar for your University Program. I am confident he will be an excellent addition to your university's community and feel assured that he will contribute to the society being a part of the profession something meaningful.

Sincerely,

 02.03.2022

Dr. B.N. Tiwary, Ph.D.

Professor of Biotechnology &

Dean of the School of Studies of Interdisciplinary Education & Research
