

Statement of purpose

I am Anushka Saini and I am from India. I had completed my Senior High Secondary Education recently and now I want to pursue my further studies in the business management field. I had taken my education in the S.D Public School with decent percentage. I live in Muzaffarnagar city with my small family which consists of 5 members- my father, mother, and my two younger brother and sister. I belong to a middle class family and my father is a businessman whereas my mother is a housewife.

To continue my further education I had decided to study in South Korea and I had chosen this country because, very firstly, it was my dream to pursue my education in South Korea and I admire its beauty a lot. Also I am fond of its culture, fashion, food, and I respect its traditions and values too. And according to me, after studying in South Korea it'll open up a wider range of employment opportunities for me.

As I had mentioned earlier also I want to pursue my further studies in Business Field. This is because, I had a great interest in business and as I had completed my Senior High Secondary Education from Commerce stream I had developed a strong grip over Accounts and Business Studies. Also pursuing BBA will help me to develop my managerial skills. This course is also well suited to me as I aspire to be entrepreneur and manager too. BBA will also help me in pursuing MBA with an excellent stepping stone as during my bachelor's in BBA I would learn all the basic concepts of Business Administration, managerial skills which will help me to create the better understanding of management course which can work to my advantage. I also want to do BBA so that I could learn more deeply about business and its operations. Therefore, I desire to earn my Bachelor's degree in Solbridge School to explore my knowledge and education more. I had chosen this school because the first and most important reason is that it had fully English-Taught curricular degree programs. Also it had great location around in Daejeon. I had explored a lot about this school and had found many favourable points which are great for a student to start his/her education over there.

During my education in the school, firstly, I would complete my bachelor's with decent GPA. Meanwhile, I would also try to learn Korean language so that I can interact with the students and people around me and also I could learn and understand Korean culture and traditions easily. I would also love to enroll myself in extra curricular activities and in my other hobbies which I love to do as playing badminton and basketball. I admire these games as they both help me to keep myself energized and active. Singing and listening to music is also my another hobby as it helps me to remain motivated and also it brings joyfulness. I am slightly little creative too hence, I also do crafting, painting, origami etc. What else is my favourite hobby is cooking and discovering new recipes and dishes. Therefore, I would like to develop myself both as physically and educationalist. Also after completing my whole education in South Korea I would like to apply my skills and studies in my country too.

Therefore, I would desire to enroll myself in Solbridge International School in order to explore myself as well as for my betterment of future.
