

October 27, 2023

Dear Yash Sarin,

We are pleased to inform you that you have been accepted to the Master of Engineering in Artificial Intelligence program at Endicott College. Based on several factors including your interview, your academic performance, your English ability, and your extracurricular activities, you have been awarded a tuition scholarship of 30%.

We will send you an itemized invoice in the next few weeks.

Once you have received your invoice, you can print it and go to the bank. There will be instructions on the invoice for your bank to complete the wire transfer. International banking can be slow, and wire transfers can take 5-15 days depending on your local bank, so pay your invoice as soon as possible. Please read the invoice carefully. You must send the payment to your account number listed on the invoice.

When our finance department receives your payment, and all relevant documents from you, we will prepare and send your original stamped and signed visa issuance documents. We will email you when these are sent along with the tracking number. You will need these documents to get your Korean student visa and won't be able to get the student visa without them.

In the coming weeks I will be sending you several more emails that include additional information about preparing for your arrival in South Korea and the visa process. We will also email you when your invoice is ready to download.

Make sure to look for more emails from Endicott College.

We look forward to meeting you at Endicott College in South Korea, the Land of the Morning Calm!

Best Regards,

Sam Kang
