LETTER OF RECOMMENDATION

I am extremely happy in recommending the candidature of **Mr. Shaik Abdur Razzaq**, for admission to the graduate program at your University. I know him over the past 3 years as his faculty for Machine learning and Artificial intelligence courses and I take this opportunity to write some of my observations as below.

He has been a bright student which is evident by his academic scores. He has a good understanding of fundamental and his learning ability is excellent. He is so keen and prodigal in Artificial intelligence and machine learning laboratories finishing the given tasks early and assisting his peers. The ability to visualize and link together the fundamentals of each subject makes him an ideal student for research.

He had manifested a hefty interest towards research and tried to connect the topics of the course with the areas of his interest. This thinking ability are evident by the way he associated. Theory subjects taught in the classroom to programmatic applications and the way he kept pace with recent advances in science & technology by giving technical seminars. In our academic interactions, he came up with pioneering ideas and was efficient in indicating practical & objective approach which demonstrated his critical thinking capabilities.

He strives hard and comes up with creative ways to apply his programming knowledge in other disciplines. For final year project, he worked collaboratively with his teammates under my guidance leaded by him, which they named as "Prediction of Paddy Leaf Diseases Using Deep Learning" and it shows the visual perception she has towards the enactment of technology to find solutions in security field and also he has the unconventional style and creative ability in organizing different events at our college. He is one of the coordinator of Computer Science Department association for designing and planning the events to be held in the association.

I feel proud to recommend the candidature of **Mr. Shaik Abdur Razzaq**, to the graduate program at your renowned university with possible financial aid and feel certain that he would rise to the occasion.

(**Dr. R.M. MALLIKA**)
