Ref. No. AGTJC / 1981 / 2022

Date : 02.08.2022

Letter of Recommendation

Anuraag is a student with immense potential, which he often displayed during his interactions with teachers. He possesses good interpersonal skills and has shown excellent leadership traits. His command over the English language is commendable and his pleasant and friendly disposition has helped him to contribute positively towards working as a team.

His distinct characteristic is the polite manner in which he conducts himself with teachers and fellow classmates. His meritorious performance in both, academics and extracurricular activities, clearly establish that has intellectual and personal qualifications needed to apply for any undergraduate program.

I thereby strongly recommend Anuraag Prakash Upadhyay for admission to your University as he would definitely prove to be an asset to your institute.

Letter of Recommendation

It is with great pleasure that I am writing this recommendation in support of Mr. Anuraag Prakash Upadhyay, one of my most intelligent, dynamic, and committed students, who is applying to the bachelor's program in Finance at your esteemed university. Having interacted with Anuraag for two years in my capacity of his teachers, I have complete confidence about his suitability for the program and also his ability to complete this program with flying colors. As such, I have no hesitation in formally recommending Anuraag for admission.

Computer Science was the subject that I have formally instructed Anuraag in over two years and I have come to appreciate both his passion and natural appetite for this subject. In the classroom sessions Anuraag strived to get conceptual clarity and was never shy about asking questions whenever he had any queries or doubts in his mind. Anuraag was able to answer most of the questions put to the class and I was satisfied with the depth of his knowledge as well as his lucid manner of communication.

During my formal and informal interactions with Anuraag, I have come to understand and appreciate his strong focus on application of knowledge and his overall efforts in acquiring practical skills which I think are worth a mention in this communication. He has given a good demonstration of analytical, critical, and logical thinking skills that are essential for coding and programming. During the practical sessions, Anuraag worked on solving the assigned problems and then used the spare time to practice his skills. He was generally ahead of his peers in completing the tasks and something that defined his work was the overall attention to small details and relatively lower number of errors as compared to his peers. Anuraag has always worked on using his own methods along with the ones mentioned in the textbooks and has been successful in these endeavors most of the times.

Along with the courses in Java and C++ as part of the curriculum, Anuraag has stepped out of the curriculum and has acquired diverse skills which are essential for web application development. I am aware of the certification program in web designing that Anuraag has completed at a respected training provider platform. With the increasing use of computers and computing in any domain, I am sure that his overall abilities in computing would help Anuraag in his future academic and professional pursuits.

Anuraag has a wide bandwidth of interests and is quite fond of instrumental music. He has completed the first level examination for keyboard from Trinity School of Music. His participation in various co-curricular and extracurricular activities was quite positive and I would particularly like to mention his significant contributions to the community development programs aimed at the underprivileged sections of the society.

It is on the basis of his overall personality, aptitude, and interests that Anuraag has chosen the bachelor's program in Finance with the aim of pursuing a career in this core field and I am confident that he has the attributes essential for the same. I once again put forth my strong recommendation for Anuraag admission and extend my best wishes to him.

Sincerely,

Ms. Shruti Salagare

Assistant Teacher of computer Science

Arya Gurukul International Jr. College, Airoli
