

NAME: ARYA JESSY BABU

DEPARTMENT: MASTER OF BUSINESS MANAGEMENT

TERM: SEPT 2023 Intake.

STATEMENT OF PURPOSE

MYSELF

“TIME AND TIDE WAIT FOR NO MAN”, I being a student, understand this aspect well and would not like to miss this opportunity to pursue my higher education in the field of MASTER OF BUSINESS MANAGEMENT in your esteemed and prestigious University. I pursued my B.E in Acharya Nagarjuna University(ANU) which is Deemed to be University, which builds me as a person with great confidence. It also provided a scope of learning skills that fetches me to reflect my attitude of self learning and innovation.

WHY GRADUATE STUDY

Education aids in widening our perception and raising our ken. That is why I want to utilize this key factor in moulding my personality. In the thirst of gaining global knowledge, I would like to utilize the opportunity of completing my graduate studies in the bank of knowledge and vision of your university which facilitates a wide range of international students by providing ample infrastructure and financial aid along with divine knowledge of academics. After a good deal of self-evaluation, Hence, having done an inspiring four-year course in Bachelor of Computer Application, I would like to put to use this knowledge to do **Master of Business Management**. This would give me the leading edge in technology and the practical low-down and information I require. For this, research would be of prime importance with hands on experience in real time applications accompanied by in-depth knowledge of the subject. Technology today, means power in the widest sense of the term and not merely the power of mind. And it is this power potential that has given it the status it now enjoys. The Strong desire to absorb the fundamental principles in any subject of study has enabled me to adopt a rigorous and analytical approach to problem solving which has inculcated in me the method of scientific enquiry. My consistent academic performance makes me feel confident of holding my own against the very best and I have developed a deep interest to pursue the graduate studies.

ACADEMIC BACKGROUND

Prior to my graduate course, it has been my good fortune to pursue my primary and secondary school education from the best schools of the day. Right from my school I had an inclination for Mathematics, which proved decisive in choosing a career in Engineering. I have always had a consistently good academic record right from my school. I scored 68.0% in the Secondary School Certificate (SSC), Andhra Pradesh and 54.8% in the Board of Intermediate Education. This got reflected in my receiving several scholarships at the end of my high-school career, I consistently maintained excellent academic records. Then, I joined my undergraduate course of study in Bachelor of Computer Application. I completed my Bachelor of Engineering with overall aggregate of 61.8%. As part of my course curriculum I have been exposed different theory and laboratory courses in addition to this

computers revolution was also a significant spur that drove me to undertake formal and informal project works in the field of hardware Analysis, Design and Development. This improved my knowledge immensely, which have given me a firm base on which I could engineer my dreams.

EXPERIENCE :

I have gained valuable experience as a Junior Assistant cum Typist (J.A.C.T.) at Sanviya College of Elementary Education in Bapatla, where I worked diligently for 2 years and 8 months. This role allowed me to develop strong organizational skills and attention to detail, ensuring efficient typewriting tasks and assisting in administrative duties and I pursued full-stack Python developer training at Naresh IT. This comprehensive training program focused on honing my expertise in both back-end and front-end technologies, as well as frameworks. Throughout the training, I dedicated myself to mastering the intricacies of Python programming language, enabling me to tackle complex coding challenges and develop robust solutions

My Future Plans:

After completing my Masters, I would like to come back to India and this program can help me in achieving my dreams. I am confident that my choice of pursuing **Master of Business Management** an esteemed University will support me in building my career path towards my goals. As India is emerging as a world's top growing Industry, there are many companies offering and helping their employees to set up a good career path. I will be acquiring a good knowledge and skills in all aspects and this program gives the knowledge and skills required for programming and scripting which gives great aspect to prepare me for a successful career. I will utilize my post study work which is for a time period of 1 year to work in the Swansea University after completing Master's degree, as the internship in the University will give hands on experience and practical exposure that will help me in finding a job. Hence after completing 1 year of PSW, I will get a huge practical exposure, Time Management Skills, Hands on experience in dealing with security aspects, Team work. All these things will increase my confidence and the experience I have gained during PSW will help me in getting a good job after coming back to India. In this way I will utilize my PSW in the London. After returning to my home country.

After completing this course, I will come back to India and start searching in internet about available vacancies in good MNC's. I can choose the Job roles such as data engineer, data scientist, Business Intelligence Analyst, Business analyst etc., which are highly valued in India and the practical exposure, hands on experience gained during PSW will enhance my knowledge & skills. As I gained lot of knowledge in my course, that will help to achieve a good job in a Multi-National company. After getting a job I will implement what I have learnt in the London in my job and will grow in the organization to a top position in two years of time period where my salary will get increased.

REASONS WHY NOT INDIA:

I could have chosen my home country for master's degree but I want to study in a better environment and I also want international exposure. I don't feel that the quality of education that I am expecting in the France is possible in my country. Our country's educational system depends on repetition and recitation of subject which lacks practical exposure. The subject which I have chosen doesn't have enough facilities in industrial needs, labs and infrastructure, internship and research options since MASTER OF BUSINESS MANAGEMENT is a new subject. Indian studies are also globally recognized and has got a good reputation across the world, but if I study in India I will not get any type of International Exposure which is very important in today's competitive world especially in Engineering Management Industry. I had done my bachelors in my country and I had noticed that our education system has very little to do with practical knowledge and training. It gives more importance to theory whereas education system in France gives more importance to industrial needs and work exposure. So when I had decided to go for higher education, I decided to study in abroad.

I am sure I will be getting a good position with my Qualification and skills set which help will me grow career wise, and also I can support my parents who have encouraged me and given me the wisdom to take my own decisions.

SUMMARY

I believe that the international education will present me a rare opportunity for a solid foundation for a future career in the field of Business Management with personal growth. I look forward to get an admission which could fulfil my dreams of university in the France and want to thank you for the consideration of my application.

(A. Jessy Babu)
