LETTER OF RECOMMENDATION

Date: 05-12-2022

I am extremely pleased to give this commendatory introduction about Edward Staines, for whom I have taught undergraduate courses. A very advertent student in the class, endowed with a good creative potential, Edward Staines has displayed an impressive ability to grasp the gist of the subject. He is a fun and level-headed person, passionate about automobiles and always likes to learn and gain new experiences.

During his course of study, I have handled a subject "Design of transmission systems" and found his performance very appreciative. He has been very interactive during class and has an inclination on the practical application of concepts which convinced me of his indisputable potential and motivation for graduate studies. He has been Captain of Team Turbonites - SAE BAJA, served as its Technical Head (2021-2022). He actively involves himself in various clubs, namely, SAE, ARME, PALS – Student Coordinator, Rotaract, and NSS. He has acquired adequate coding, soft and design skills – CAD (Solid works, Siemens NX, Fusion 360) and took a course on Robotics, NX cad.

He is very ambitious with a well-focused and determined mind set. His enthusiasm, in depth knowledge and keenness towards the subject is remarkable. He has excellent problem-solving capabilities with good lateral thinking. His ideas are creative and have a lucid perception of the task at hand.

He has good communication skills and energetically participates in various programs in the campus. With his intellect and acumen coupled with hard working nature, he is sure to perform outstandingly well in his chosen field of study and I strongly recommend him for an admission in your esteemed university.

(Dr. N. Godwin Raja Ebenezer)

Professor/Mechanical Engineering
