Reference Letter for Mr. Ayon Kumar Ghosh

Mr. Ayon Kumar Ghosh is pursuing a Bachelor in Electronics and Communication Engineering from Vellore Institute of Technology, Vellore, India. I have interacted with Ayon as a research intern since December 2022.

As a research intern, his inclination is toward developing control solutions for robotic systems. During his internship program, he worked on a project titled "Position control of BLDC motor," where the BLDC motors are widely used as actuators in robotics and automation. In this project, he designed different control circuits for BLDC motors, implemented some of them from scratch, and presented a comparative study.

Given my observation, I have found Ayon to be an enthusiastic and hard-working student with sound engineering knowledge. He is also a good thinker and has tremendous analytic skills. He will be an excellent addition to any company or institute. I strongly recommend his application.
