

Oct 10, 2023

To whomsoever it may be of concern,

This is to certify that Mr. Ayon Ghosh was as a Remote- Research Intern for a collaborative project between the Neuroclinical Innovative Solutions Pvt. Ltd and Translational NeuroScience and Technology (TRANSIT) lab at the Indian Institute of Technology Kanpur, during the summer vacation period of 2023.

Ayon worked on platforms like Python and Unity to help build a cognitive paradigm towards a project on investigating the principles of cognitive choking in old age and its relationship with dementia.

All in all, Ayon's association with us was very fruitful and we wish him all the best in his future endeavors.

Sincerely

Pragathi Priyadharsini Balasubramani,  
Asst. Professor, Indian Institute of Technology Kanpur.

Nandini Priyanka,  
Co-founder, Neuroclinical Innovative Solutions Pvt. Ltd.
