

Self-Introduction

I am grateful to apply to the Korean language program at your university. This is a great opportunity for me to learn the Korean language and understand the culture and traditions of Korea through the Korean education system.

My name is **Yadalagood Bhimappa Radha**, and I am from **India**. I have always been a sincere, curious, and motivated person with a strong desire to learn and grow. Since my childhood, I have been interested in exploring different cultures and countries. South Korea has always inspired me through its rich traditions, modern lifestyle, and strong education system.

I completed my **schooling at Chinmaya Vidyalaya, Kolar**, with **86.72%**, ranking among the **top 10 students** in my class. I pursued **Pre-University studies at Shaydari PU College, Kolar**, and scored **87.5%**, again ranking in the **top 10**. Later, I graduated with a **Bachelor degree from Gogte College of Commerce, Belagavi**, affiliated with **Rani Channamma University**, with **76.25%**, where I was in the **top 20 students** in my class.

After completing my graduation, I started my professional journey. Currently, I am working at **Bosch Global Software Technologies**, located in **Bangalore, Karnataka**. "**In my previous company, along with my accounting role, I also worked as an event organizer.**", I handled office programs and functions such as sports days, cultural events, and company anniversaries. These responsibilities helped me develop communication, planning, and creative thinking skills.

Since 2023, I have been preparing to study abroad for my **master's degree**, but due to my father's health issues and his unfortunate passing in **March 2024**, I had to postpone my plans. Even during this tough time, I stayed focused on my goals. My father always supported my dream of studying abroad, so this course means a lot to me—not just for my future but also to honour his wishes.

My father and I carefully researched South Korea as a study destination, and we were impressed by its reputation for **safety, especially for women**, and its **welcoming environment**. The **cultural similarities between India and South Korea**, such as strong family values, respecting elders, and visiting temples, make me feel comfortable and connected. The **strong bilateral relations** between the two countries and the **growing number of Indian students in South Korea** ensure a **supportive and homely atmosphere**, which gives me the confidence to study there.

To prepare for this journey, I have already started learning basic Korean through YouTube channels and the Duolingo app. I have learned **Hangul** and **basic conversational phrases**, which have strengthened my desire to become fluent. My interest in the Korean language comes from my belief that knowing a country's native language is important for understanding its culture and communicating effectively to avoid the misunderstanding. Additionally, **proficiency in Korean will be a great help for my master's degree**. By dedicating myself to learning the language during this course, I will be better prepared to understand my academic subjects without difficulty.

I truly admire the **Korean education system** for its discipline, innovation, and focus on student development. It encourages creativity, hard work, and respect—values that deeply resonate with me. I also appreciate the **rich cultural heritage of Korea**, which blends tradition with modernity. From **Hanbok and traditional festivals** to **K-pop and Korean dramas**, Korean culture is unique and fascinating. Additionally, I have a strong interest in **Korean food**—from kimchi to tteokbokki, I enjoy exploring Korean cuisine and the way meals bring people together.

What inspires me even more is the **supportive role of the Korean government**. I deeply respect how Korea **honours other cultures** and provides opportunities for **young people from all over the world to understand each other's traditions and values**. Through **international programs, cultural exchanges, and scholarships**, the Korean government encourages youth to pursue education and build global friendships. This openness and dedication to unity across cultures is truly inspiring and motivates me to be part of this beautiful journey.

Outside academics, I have a strong interest in the **arts**. During school and college, I actively participated in **singing, dancing, and drawing** competitions and won several prizes. I also wrote a short script titled **“DREAM”**, which reflects my passion for creativity and storytelling.

I am grateful for the opportunity to apply for the Regular Korean Language Program through this Korean language program, I hope to enhance my language skills, understand Korean society better, and prepare myself academically and emotionally for my **future master's degree in South Korea**.

Thank you very much for this opportunity.
