QUAD-COPTER DRONE

Quadro stands for four, so a **quadcopter drone** is an aircraft equipped with four rotors. The rotor arms are arranged in a square or rectangle and thus allow a stable and steady ascent and flying of the **drone**. Quadcopters are the most common drones and can be found in any size. From small toys to sophisticated entry-level models to professionally used quadcopters. Quadcopters are strong enough to carry a smaller payload such as a camera but never too heavy to lose acceleration and maneuverability. It is uses

.....

- Aerial Photography & Videography.
- Real estate photography.
- Mapping & Surveying.
