PUBLICATIONS

2017

Endodontic-Forced Orthodontic Extrusion and Prosthetic Rehabilitation

- The aim of this paper was to discuss the immediate endodontic management followed by orthodontic extrusion of an upper anterior traumatized teeth with fracture at the sub-gingival level. In order to expose the sound tooth structure for prosthodontic intervention, orthodontic extrusion was performed following endodontic treatment. To avoid the extraction of the injured tooth, an inter disciplinary approach was adopted and finally the teeth were restored prosthodontically. The final result was esthetically pleasant, cost effective and periodontically sound.

IDA, WB, Vol-33, No. 3, November 2017

2017

Evaluation of Sodium Hypochlorite use among general dental practitioners: A questionnaire survey

- To Investigate the attitude & the manner in which Sodium Hypochlorite Solution is used by General Dental Practitioners & Endodontists in their clinical practice. Due to its tissue dissolving capabilities and anti-microbial capabilities there is broad acceptance of sodium hypochlorite. Hence there is wide spread endodontic use of Sodium Hypochlorite.

Journal Of Pacific Academy Of Higher Education and Research. Vol-8, Issue 3, March 2017

HOBBIES AND INTERESTS

Reading topics of medical scientific interests and spirituality

- passionate about exploring diverse subjects including medical science research and advancements
- current and future outcomes in modern medicine especially pertaining to fields of molecular biology and oncology
- explore topics on spiritual healing of the mind and soul
- exploring into topics about life and the afterlife, the karmic cycle of human life and the journey of souls across lifetimes have always intrigued me

I am eager to bring my dedication to medical research, strong analytical skills, and commitment to advancing healthcare solutions. I am confident that this program will further enhance my expertise and empower me to make meaningful contributions to the field.
