Notable projects

Civil Increase the Strength of Soil with Geogrid

- Implemented a Geogrid on soil erosion surface to bind the soil even stronger. This project is helpful to reinforce retaining walls, as well as subbases or subsoils below roads or structures.
- For instance, if we compare to soil, geogrids are strong in tension.
- I have worked under the aegis of Department of Design in which I have performed different operations which are required. For e.g.: Testing of soil.

Awards

- Certificate of Participation: National Conference on Technical Advancements in Civil Engineering 2016.
- Won a Silver medal for Shot-put in Annual Sports Day in the year 2014, 2017
- Won a Bronze medal for Shot-put in Annual Sports Day in the year 2015, 2016.
- Team Captain of Rugby Team, represented my college at Association of Indian Universities at Patiala Campus.
