EDUCATION

UG PROGRAM

Ramaiah University of Applied Sciences

08/2017 - 09/2020

Courses

▣ Mechanical Engineering

Diploma

Ramaiah Polytechnic

06/2014 - 07/2017

Courses

▣ Mechanical Engineering

Secondary School Leaving Certificate

Ramaiah High School

05/2013 - 04/2014

PERSONAL PROJECTS

Design and Development of Compression Molding Machine (08/2019 - 07/2020)

▣ Over the past few years the use of plastic is increased in many industries like automobile, packaging, medical, etc. The reason behind this is that the plastic made things are quiet easier to manufacture, handle and reliable to use. So the plastic goods manufacturing industries are striving hard to produce good quality products at large scale and cheaper cost. The hydraulically operated machines solve the problem, but they are too costlier for small scale and medium scale industries.

Design and Development of Suspension Mechanism for Rough Terrain Surface (01/2019 - 05/2019)

▣ Development of rover for moving on rough terrains for extra-terrestrial exploration. However, there are few rovers that are suitable for use in rough terrains in Earth's atmosphere. This project aims to develop a highly stable suspension system capable of operating in multi terrain surfaces for applications like Disaster mitigation and management, Security and surveillance missions, Mining rescue operations, etc.

CERTIFICATES

SAP Certified Application Associate - SAP S/4HANA Production Planning & Manufacturing (1909)
