

Statement of Purpose

For the past more than six years, I have been immersed in the workplace at Bajaj Finance Limited., a rapidly growing Non-Banking Finance company in India. Due to the demanding pace of my schedule, I used my annual vacation time to travel abroad. My travels have given me a deeper understanding of the mindsets of people in different countries as well as the diverse cultural customs and attitudes that exist in different parts of the world. Similarly, my supervisor at Bajaj Finance Limited frequently travelled overseas in order to expand the company's business into new markets. I was impressed by his international style of thinking and acting and his strong awareness of global business. My association with this supervisor, as well as my previous travels, has inspired me to pursue a career with an international focus. In the future, I aspire to hold a Senior managerial role in a multinational business; achieving this goal, however, requires that I have an international education and develop a more globalized viewpoint. Your MBA program is a key step in adequately preparing for my future goals.

After completion of My bachelor's degree in commerce at Saurashtra University in India, I began working full-time at Vodafone India Limited (formerly Hutch India) as an Executive in the Sales department, where I acquired experience in customer service and document controllership. Although this was an entry-level position, it was an instructive opportunity and a valuable complement to my professional career.

While working in a couple of years in Vodafone India Limited, I got the opportunity to work in a HDFC Bank Limited a well know private bank in India. This was an immensely valuable and enlightening experience, as it corresponded directly with that which I was learning in the university. I was responsible for searching new customers for bank and as well as them to provide effectively various services of bank's all products like Saving account, Current account, mutual fund, Insurances, Fixed deposit etc. While learning about management and finance, and other skills related to business administration in the classroom in the university during this period I developed my communication and co-ordinating abilities, and I became more familiar and confident with all financial management functions.

After that I have a worked with companies like Muthoot Finance Ltd and India Infoline finance Limited to acquire more knowledge about management skill and it help me to excel my career into the next level.

After this I Have joined a Bajaj Finance Limited as a Branch Credit and Operation Manager in the Credit and Operation department, within 2 years of my work with them, I was promoted as a Senior Area Manager Operation and Credit in Bajaj Finance Limited in Operation department. My responsibilities have increased steadily, and over the past four years in this role I have had chances to utilize my previous education and working experience to further hone my skills and operate as a professional administrator in this internationally focused company. I have been in the charge of manage certain branches, as well as training new staff members. I have found this position to be as rewarding as it is challenging; most importantly, it has provided me with a valuable foundation of knowledge in practically all aspects of business and management. However, despite this breadth of experience, I feel that it is necessary for me to pursue a master's degree in your country in order to further broaden my horizons and expand my career potential in the international business arena.

I choose France for my master studies because its seventh largest economy of the world with less unemployment rate. France is considered as a hub of many international fashion branch like Louis Vuitton, Chanel, L'oreal Paris etc.,

French universities provided excellent teaching, research with top quality of education. The reason behind the select of EMLV business school because it's located in French's beautiful capital city of Paris which is considered as a lively city for international students and famous for its multi-cultural society. EMLV provides master's degrees with very affordable prices and offer's a very decedent scholarship to the international students. Considering of all above statements I chose Germany as my study destination.

I would like to prefer Master In Management because, pursuing a Master In Management degree will give me the chance to expand my area of interest to business operations, development, manufacturing, or consulting. This international degree is designed to gives me an overall perspective, and the necessary training required to shift my career focus according to my interest. It provides me with exposure to an international community, helping me build a global outlook and open up a wide range of career opportunities.

After finishing the Master program, I expect to have acquired substantial management and business administration expertise. Running a successful company requires constantly improving quality on both the individual and business levels. Bajaj Finance Limited is a Finance company, but they would like to spread their business and brand into some other countries like UAE, Singapore, Malaysia, which requires professional management with a broad perspective. In the future, I hope to work as a Regional Manager, a role which demands excellent organizational, planning, and communication skills. If I am to achieve this goal, I must continue to improve my knowledge and experience in analysis, teamwork, communication, and organization. I feel strongly that the MBA Global program offered by your institution is ideal for developing these skills and preparing me for a managerial role in a multinational company in the future.
