

M Wamiq Siddiqui

DevOps Manager | Delivery Manager | Project Manager

+91-83031 74782
sid.totaldevops@gmail.com | Bangalore, India

Objective

As a **DevOps Manager**, I oversee the entire software development life-cycle, ensuring that development, QA and the business side all work together and software is developed on time, on task and on budget. I am seeking a position where I can use my organizational skills, troubleshooting capabilities and analytical talents to make the work environment more efficient, cost effective, productive and pleasant.

Professional Summary

- Wamiq has **15+ Years of experience** in the technology space. A dynamic and proficient DevOps professional having more than a decade of core experience in Waterfall, Agile & DevOps frameworks. Lead multiple cross functional engagements globally to successful implementation of infrastructure and software applications. Expertise in functional & technical analysis of cloud and enterprise solutions, application & database development and client management. Experience in designing & delivering critical projects with end-to-end process automation across technology stacks using DevOps framework.
- **Currently Wamiq is a Senior Solution Architect working with Wipro Technologies.**
- Innovated, result-oriented technology leader with years of progressive experience ensuring growth and decisive leadership in large companies such as **Siemens, Thomson Reuters, HPE, Accenture** and **Start-up firms**.
- Managing and leading cross functional teams to the successful implementation and migration of software applications.
- Extensive experience in implementing full software development life cycle [SDLC] using Waterfall, Agile and DevOps frameworks.
- Thorough experience in End-to-End project management - scaling from pre-sales consultation, feasibility studies, estimation to post project implementation and customer support.
- Implementing Continuous Integration (CI), Continuous Deployment (CD) and Continuous Monitoring (CM) process of DevOps framework thereby bringing the cross functioning development & operations teams together under an umbrella.
- Strong team building capabilities with skills to lead, motivate and coach teams. Resource planning and management.
- Strong technical background in the areas of infrastructure engineering, Agile, DevOps, MLOps, AIOps, Machine Learning, product engineering, technology architecture, automation, and platforms engineering, coupled with the ability to meet business objectives.
- Rich experience in implementing large enterprise scale systems, driving technology transformational efforts, leading high-performance engineering teams and production management to address complex business challenges in the retail products, legal and financial segments.
- Strategic Planner & Forward Thinker – Anticipate changes, identifying game-changing opportunities. Think critically to re-frame problems to determine root cause, data driven approach to validate assumptions and multiple hypotheses.
- Work collaboratively with business and technology partners, devise business strategy, deliver business cases, secure programs, govern execution and deliver ROI. Drive resources accountability, build effective teams, and manage all aspects of the program.
- Identify and plan future state of enterprise cutting-age technology environments while incorporating new solutions that create a strategic advantage and expanded business growth. Drive digital transformation plans, processes, and systems deliver insight needed to foster innovation.

Technologies and Expertise

- **Version Control tools:** TFS, Bitbucket, Git, GitHub
- **Continuous Integration (CI) tools:** TeamCity, Bamboo, Jenkins
- **Build Tools:** Ant, Maven, Gradle
- **Scripting:** Batch Scripting, Shell Scripting, Python
