

The country is a home of diverse ethnicities, the highest number of top-ranked universities, and a picturesque landscape. The USA is truly a land for opportunities, a destination for immigrants seeking new vistas. It's a country that is not only a pioneer in technological innovation and scientific exploration, but it is also highly regarded for its motion picture industry, and art and architecture. With the most international mix of people inhabiting the US, it is a true amalgamation of various lifestyles and cultures. The U.S. has the largest population of international students with more than 800,000 students opting this country as their most favored overseas education destination. Being one of the leading studies abroad destinations, the country opens the gateway for ample career opportunities to international students in various fields of work.
